**SPECIAL INTEREST GROUP**

# palliative care nurses

## SPECIAL INTEREST GROUP

Associate Members of  
*Palliative Care Victoria*  
ANF (Victorian Branch)

Palliative care is a holistic concept of care for people who are living with a life-threatening illness.

Palliative care seeks to respond to people's physical, psychological, emotional, spiritual and social needs whether at home or in the in-patient setting.

# welcome

Palliative care nurses work in interdisciplinary teams and co-ordinate care in consultation with clients, their carers and other team members.

*The Palliative Care Nurses Special Interest Group* is a group of Victorian Division 1 and Division 2 Nurses who meet quarterly in a variety of community and hospice settings. The members share a passion and commitment to palliative principles.

The group warmly welcomes nurses working in palliative care as well as nurses interested in the area. The

objectives of the group include the exchange of knowledge, expertise networking and collaboration across palliative care agencies. By sharing our experience, we emphasise the expert skills required to work in this specialised area.

*The Palliative Care Nurses Special Interest Group* supports the recognition of palliative care as a specialist area of care. Regardless of your palliative care experience, join in and have your say at directing palliative care in Victoria!
